# Digital Switching Technology

- ✓ **One touch. Full control.**  
One touch gives you control and the ability to monitor your onboard circuits and power system.
- ✓ **Set 'modes of operation'.**  
Bundle loads for easy control; one button to go boating, one button for at home, and customize others to the way you want to use your boat.
- ✓ **Integration with leading electronics manufacturers.**  
Including Garmin and Navico's Simrad and B&G brands for full control and monitoring of your system at the helm.
- ✓ **Reliable system.**  
Electro-mechanical back up fusing, system intelligence in all modules and easy replacement of modules
- ✓ **Control from various platforms.**  
Key fob, CZone monitor (available in various sizes), tablet or electronic display screen to display, control, and monitor system information
- ✓ **Customizable and scalable.**  
From simple systems to the ability to have all the comforts of home onboard, CZone provides the information when, where and how you want it.

- ✓ CZone digital switching technology meets global marine industry standards and utilizes an NMEA 2000 protocol.
